Glacier		Benolite mine		Fire Lookout (Primary)		Intermittent Lake or Pond	
Road Bridge		Levee or Dike		Fire Lookout (Secondary)		Dry Lake or Pond	
Railroad Bridge		Corral		Fire Tool Cache		Marsh	
Foot Bridge		Recreation Site		Shelter		Spring	
Ferry		Tanks-(label as to type)		Cliff Dwelling		Improved Spring	
Road Ford		Gas wells		Small Ruins		Well	
Trail Ford		Oil wells		Large Ruins		Artesian Well	
Road Tunnel		US Mineral or Location Monument		Cemetery		Windmill	
Railroad Tunnel		Located Object (Labeled)		Sawmill		Aqueduct Tunnel	
Coal mine		Triangulation Station		Airfield		Ditch or Canal	
Prominent Peak		Bluffs or Cliffs		Gaging Station		Aqueduct	
		Prominent Ridge					

The Yellowstone Area Wide Plan for Organic Resources is a guide for a water quality project that includes Carter, Gater, Fallon, Powers, and Treadwell and the Northern Cheyenne Indian Reservation.

The project will be developing a program designed to maintain the quality of the water and the groundwater within the area.

Parts of this water quality management program have already been developed. Additional materials will be developed in the near future. As this material will contain guidelines for the control of sediment and salinity as well as domestic and industrial wastes, everyone should be interested in reviewing and commenting on it.

A series of public meetings will be held to discuss this material and to draw input from interested citizens. The exact time and locations of these meetings will be announced in the newspaper. They are tentatively scheduled for:

Forkyeth,	July 18, 1977
Miles City,	July 19, 1977
DeLana,	July 20, 1977
Brucina,	July 21, 1977

For additional information, write the Yellowstone-Tongue Water Quality Project in Broadus, Montana, 59317, or call collect (406-280-1).
